---

*A self-taught software engineer passionate about technology and logic, with experience in software architecture and remote work for startups. I am known for my discipline, organization, and constant focus on learning and delivering high-impact solutions.*

## PROFESSIONAL EXPERIENCE

---

### Despegaa

Software Engineer

**Oklahoma, United States**

*September 2025–Actuality*

- Architected the initial project structure, defining the database schema, frontend architecture, and authentication logic.
- Developed and integrated full-stack features, delivering a seamless, high-performance user experience
- Built an AI-powered SaaS product to address real market needs, driving business scalability and competitiveness.
- Designed and engineered a high-conversion landing page to boost user acquisition.

### GangaIn

Freelance Full-Stack Developer

**Argentina, Buenos Aires**

*November 2025–February 2026*

- Restructured and optimized the frontend architecture, enhancing business logic and error-handling systems.
- Directed frontend modernization by migrating dependencies to stable versions, ensuring maximum compatibility and performance.
- Refactored backend services to streamline error handling and improve overall system reliability.

### WillCar

Freelance Full-Stack Developer

**Colombia, Bucaramanga**

*October 2025–November 2025*

- Led a 3-person development team to build a corporate web application, ensuring high-quality and timely deliverables.
- Designed the complete system architecture, database models, and UML diagrams with a strong focus on scalability and maintainability.
- Implemented end-to-end functionality, delivering a robust administrative dashboard and comprehensive CRUD operations.

## EDUCATION

---

### COURSERA - UNIVERSITY OF ALBERTA

Software Architecture

**Quito, Ecuador**

*July 2025*

### CODECADEMY

Front-End Engineer, Computer Science

**Quito, Ecuador**

*July 2025*
